

# Fly Fishing Guide Branson Mo

Branson Missouri Fly Fishing Guide, this is a page dedicated to just that The Joy of catching fish on a fly rod, the art of actually fooling the fish into thinking they are eating a sometimes minute insect and the art of presenting that fly to them in a natural way!

With most types of fishing you use the weight of the lure or a sinker to cast out, when you fly fish the lure or fly has no weight to it so therefore a fly rod is longer to cast the fly line. The flu line is much bigger than conventional line, this bigger and sometimes weighted line is designed to propel the fly to the fish. The bigger and heavier the fly is the bigger and heavier the fly rod and line needs to be.

In the Branson fly fishing Lake Taneycomo area we use 3wt to 5wt fly rods 7.5ft to 9ft day in and day out, in the fall when the big boy's show up we will step up to 6wt to 8 of 9wt depending on the generation schedule.
